Risk Assessment

Cause	Value
Largely related to direct impacts of project footprint, and inherent sector risk including contribution to cumulative risks	Moderate
Comments: The operation has the potential to cause minor direct impacts associated with accidents, injury, and disease arising from, associated with, or occurring in the course of work.	
Contribution	Value
Largely related to indirect and induced impacts, third party actions, associated facilities, supply chain aspects, and indirect contribution to cumulative impacts	Moderate
Comments: The operation will have minor indirect and/or cumulative adverse impacts on human health and the environment due to pollution from project activities. The operation will generate minor indirect and/or cumulative impacts generated by solid waste (hazardous and/or non-hazardous).	
Context	Value
Largely related to influence and impacts from external operating environment on project setting, including legal framework and practice, vulnerability risk, political and social conflict, cultural context, legacy issues, etc	Moderate
Comments: Natural hazards, such as earthquakes, droughts, landslides, floods, wildfires, or others, including those caused or exacerbated by climate change, are likely to occur in the project area, and these may moderately impact the project, and/or the project may moderately exacerbate the risk from natural hazards to human life, property, and/or the environment.	
Performance	Value
Directly related to borrower capacity and organizations, commitments, resources and overall performance during project	Moderate
Comments: The Borrower/Executing Agency's has moderate organizational capacity and competency for managing environmental and social issues.	
Overall Environmental and Social Risk Rating	Value
Please indicate the overall ESRR of the project according to your professional judgement at this point in time	Moderate
Comments: Due to risk factors cause, contribution, context and performance the overall rating is moderate
