

Program of Assistance to the Basic Sanitation Sector

PERU

SECTOR: Sanitation

PROJECT NAME: Program of Assistance to the Basic Sanitation Sector
(ATN/JF-4345-PE)

TOTAL COST: \$3,300,000

FINANCING:

IDB	\$2,500,000
LOCAL	\$ 800,000

APPROVAL DATE: October 6, 1993

GENERAL DESCRIPTION: The main purpose of this technical cooperation project is to provide partial financing for the preparation of an environmentally sound and financially and economically feasible, representative sample of 10 institutional and operational strengthening projects for 10 water supply and sewerage utilities. The sample will be used to prepare a program of assistance to the basic sanitation sector. To achieve this objective, a legal, institutional, financial and technical analysis of each of the 10 representative utilities selected will be conducted and feasible technical alternatives meeting the least economic cost requirement will be developed.

The projects developed will be required to increase the net present value of the proposed investments, and the studies are expected to result in projects that will not have any adverse environmental impact on the surrounding areas. In addition, the technical cooperation project will finance the preparation of preliminary expansion plans for the water supply and sewerage systems operated

by the utilities, identifying possible investment projects and estimating the costs of the first stages for such plans.

CONSULTANTS: Not applicable.

GOODS AND EQUIPMENT: The resources of the Bank financing will be used to purchase some computer equipment, furnishings, materials and other equipment.

CIVIL WORKS: Not applicable.
