

Safeguard Screening Form

Operation Information

Operation		
BA-T1059 Walkers Reserve Integrated Master Plan and Restoration Pilot		
Environmental and Social Impact Category	High Risk Rating	
C		
Country	Executing Agency	
BARBADOS	US-IDB - INTER-AMERICAN DEVELOPMENT BANK	
Organizational Unit	IDB Sector/Subsector	
Climate Change	BIODIVERSITY AND PROTECTED AREAS CONSERVATION	
Team Leader	ESG Primary Team Member	
GERARD P. ALLENG		
Type of Operation	Original IDB Amount	% Disbursed
Technical Cooperation	\$650,000	0.000 %
Assessment Date	Author	
6 Mar 2019	gerarda Team Leader	
Operation Cycle Stage	Completion Date	
ERM (Estimated)		
QRR (Estimated)		
Board Approval (Estimated)		
Safeguard Performance Rating		
Rationale

Comments	

Safeguard Screening Form

Conditions / Recommendations

No environmental assessment studies or consultations are required for Category "C" operations.

Some Category "C" operations may require specific safeguard or monitoring requirements (Policy Directive B.3). Where relevant, these operations will establish safeguard, or monitoring requirements to address environmental and other risks (social, disaster, cultural, health and safety etc.)

The Project Team must send the PP (or equivalent) containing the Environmental and Social Strategy (the requirements for an ESS are described in the Environment Policy Guideline: Directive B.3) as well as the Safeguard Policy Filter and Safeguard Screening Form Reports.

Summary of Impacts / Risks and Potential Solutions

The project is located in an area prone to [hurricanes](#) or other [tropical storms](#) and the likely severity of the impacts to the project is [moderate](#).

A Disaster Risk Assessment, that includes a Disaster Risk Management Plan (DRMP), may be necessary, depending on the complexity of the project and in cases where the vulnerability of a specific project component may compromise the whole operation. The DRMP should propose measures to manage or mitigate these risks to an acceptable level. The measures should consider both the risks to the project, and the potential for the project itself to exacerbate risks to people and the environment during construction and operation. The measures should include risk reduction (siting and engineering options), disaster risk preparedness and response (contingency planning, etc.), as well as financial protection (risk transfer, retention) for the project. They should also take into account the country's disaster alert and prevention system, general design standards and other related regulations.
