Résultats

Résultat:	Public perception of public services improved (efficiency).
Suposições:	Following staff performance improved and technical skills transferred, one should expect a significant positive impact in the effectiveness of the areas of public institutions participating in the project.
Observações:	The loan proposal did not specify outcome indicators for the overall program because of 'most technical assistance projects are not measurable in quantitative terms'. It is worth noting that the results matrix was 'retrofitted' in August 2008 following an indicators workshop agreed with the Executing Agency.
