

## INDICATIVE LIST FOR POTENTIAL EXPENSES ELIGIBLE FOR THE CCF WITH COVID-19 COVERAGE

### PILLAR GROUPING ACCORDING TO OBJECTIVES (INTERNAL USE FOR PCR)

OBJECTIVE		PILAR	
O1	Reinforce the response management throughout the country	P1	Management, planning, and follow-up throughout the country
		P8	Operational and logistics support
O2	Improve the detection and follow-up of cases	P3	Surveillance, rapid response, and case research equipment
		P5	National laboratories
O3	Support efforts to interrupt the illness transmission chain	P2	Risk communication
		P4	Entry points
		P6	Infection prevention and control
O4	Improvement of service provision capability	P7	Handling of cases

### INDICATIVE LIST OF ELIGIBLE CATEGORIES AND ITEMS

PILLAR	CÓDIGO	CATEGORY	ITEM (REFERENTIAL / NOT EXHAUSTIVE)
1. Coordination, planning, and follow-up throughout the country	O1P1A	Expenses related with follow-up and evaluation to determine the effectiveness and impact from the measures taken	Technical assistance or consultancy services to implement and assess response strategies
			Technical assistance of consultancy services to implement a follow-up and evaluation system
	O1P1B	Evaluation of the implementation and the epidemiologist situation	Technical assistance for data management and progress assessment
2. Risk communication	O3P2A	Communication to inform about the details of the expected public health measures, as well as behavior changes to promote prevention hygiene habits	Communication campaigns (design, implementation, or strategy assessment)
			Promotional material
			Media broadcasting
	O2P3A	Expenses related to case detection	Transportation expenses for sample gathering

PILLAR	CÓDIGO	CATEGORY	ITEM (REFERENTIAL / NOT EXHAUSTIVE)
3. Surveillance, rapid response equipment, and case research			Staff training expenses
	O2P3B	Materials for sample gathering	Triple packing boxes for transportation
			Means of transport for laboratory (e.g., tubes, microtubes)
			Personal protective equipment (e.g., facemasks, gloves, protective suits)
			Supplies for testing
	O2P3C	Diagnose tests and related services	Gloves, facemasks for medical staff and patients
			Polymerase Chain Reaction tests (PCR) and rapid diagnostic tests (RDT)
	O2P3D	General logistics expenses to handle diagnose materials	Transportation expenses for staff mobilization to gather diagnostics (plane tickets), storage, and arrangement
4. Entry points	O3P4A	Adaptations to install equipment for sanitization barriers and passenger isolation	Wall building or installing of removable walls to obtain separate areas
	O3P4B	Equipment or materials to detect suspicious cases	Infrared thermometers, swabs, test taking
	O3P4C	Assurance for patient transportation (mainly towards places for isolation or quarantine)	Ambulances, isolation capsules, large incubators
	O3P4D	Materials for the safety of the staff and/or passengers	Personal protective equipment (PPE) for officials; facemasks and anti-bacterial gel for passengers
	O3P4E	Communications material	Flyers, posters, brochures to spread information digitally in order to communicate or sensitize passengers
5. National laboratories	O2P5A	Coordination of the national or regional network of COVID laboratories	Additional services for laboratory operations
	O2P5B	Adaptation of facilities to obtain, manage, and channel tests	Temporary modifications and adaptations for laboratories
	O2P5C	Equipment, supplies and materials (reactants) for laboratories*	COBAS analyzers
			Microcentrifuges

PILLAR	CÓDIGO	CATEGORY	ITEM (REFERENTIAL / NOT EXHAUSTIVE)
			Reactants and supplies for serology studies
			Vortex agitator
			Safety cabinet
			Purchase of PCR o RDT tests
	O2P5D	Biosafety measures for laboratories	Sterilization solution for surfaces
			Protective equipment specialized for laboratory staff
	O2P5E	Expenses related to the shipment of samples to regional laboratories	Transportation expenses
<b>6. Infection prevention and control</b>	O2P5F	Referrals to private institutions for diagnostics	External laboratory services to process samples
	O2P5G	Handling of biological residues (at different levels in partnerships with other laboratories)	Containers
	O3P6A	Hygiene, sanitization, and disinfection of health institutions and public spaces	Adaptation of public spaces with high risk of infection
			Registration, filing, and research of potential cases
			Protocol development and training
	O3P6B	Control and surveillance of potential cases and exposed medical staff	Monitoring plan for exposed health staff
	O3P6C	COVID-19 transmission prevention	Purchase of certified COVID-19 vaccines available in the market
			Purchase of COVID-19 vaccines through procurement agencies using the Advance Market Commitment mechanism
			Equipment and supplies required for the storage, distribution, and handling of vaccines according to WHO guidelines
<b>7. Handling of cases</b>	O4P7A	Clinical support*	Supplies for laboratory areas, radiology, blood bank (Plasmapheresis), kinesiology, pharmacy (medication for handling of patients)

PILLAR	CÓDIGO	CATEGORY	ITEM (REFERENTIAL / NOT EXHAUSTIVE)
	O4P7B	Non-clinical support services	Food (patients and/or staff), clothing, laundry, hygiene, surveillance and security, information technology services. Residue treatment within the hospital
	O4P7C	Ambulatory services	Mobilization expenses for health staff
	O4P7D	Protective equipment for health staff	Facemasks (surgical and N95), robes, protective goggles, face shields, gloves, suits, boots, caps
	O4P7E	Patient isolation expenses	Supplies for patients (e.g., facemasks, other disposable supplies)
	O4P7F	Medical staff related directly with assistance to people infected with COVID-19*	Defibrillators
			Oxygen concentrators
			Ventilators
			Resuscitator
			Mobile X-rays, ECG machines
			Oximeters
	O4P7G	Non-medical equipment	Hospital beds, furniture
	O4P7H	Expansion of the capacity for medical/hospital attention for assistance for COVID-19	Modular facilities for isolation (lightweight and temporary structures for quick implementation)
			Infrastructure adaptations for triage
			Temporary modifications
			Equipment to handle biological residues
	O4P7I	Referrals to private institutions caused by the COVID-19 emergency	Hospitalizations expenses for services and patient assistance
	O4P7J	Sterilization, maintenance, and medical waste disposal, as well as other biological residues	Medical facilities sterilization services
			Soap (liquid, powder, or bar)
	O4P7K	Urgency medical transportation and ambulances	Ambulance renting
	O4P7L	Mobile medical brigades	Expenses related to mobilization and supplies

PILLAR	CÓDIGO	CATEGORY	ITEM (REFERENTIAL / NOT EXHAUSTIVE)
	<b>O4P7N</b>	Isolation, storage, transport, and disposal (handling of corpses) expenses	Bags, caskets, and corpse storage or transportation expenses
			Adaptation of facilities for corpse handling (cold chambers)
	<b>O4P7O</b>	Burials or cremations	Burial or cremation for corpses
<b>8. Operational support and logistics</b>	<b>O1P8A</b>	Mechanisms for collection, storage, safety, transportation, and distribution for medical supply chains and other essential supplies (including vaccines), according to the WHO guidelines	Input transportation services, including distribution in-country distribution
			Services of specialized agencies for the distribution of COVID-19 vaccines
			Storage and refrigeration services and supply chain management services
	<b>O1P8B</b>	Reimburse of expenses for additional working hours of essential staff deployed specifically for the COVID-19 emergency	Payment of additional hours for administrative essential hospital staff
			Payment of additional hours for military and police staff
