Expense Categories by Operation (cumulative values)

0.1 Productive sectors financing as percentage of total credit to the economy by financial intermediaries.						According to the Central Bank of Barbados in 2013, the credit to productive sectors equals 33% of the total credit to the economy by the financial intermediaries. The indicator will measure the improvement of the credit to productive sector to total credit to the economy by financial intermediaries' ratio by the final period of the program compared to the baseline ratio.	P	35.00
							P(a)	35.00

Outcomes

Outcome:	0 New investments supported by the program
Observation:	The indicator measures the amount in US\$ of new investments for SMEs supported by the program vis a vis the variation of the indicator of the non-beneficiary firms Note: An effort will be undertaken to monitor the women participation for firm's ownership. Source: ex post impact assessment, as described in the Monitoring and Evaluation Plan.

		US mlls	0.00	2015	Source: ex post impact assessment, as described in the Monitoring and Evaluation Plan.			
Outcome:	1 Sales per worker observed on the beneficiary firms							
Observation:	The indicator is equal to the average real sales per worker for the beneficiary firms compared to the same indicator for a comparable non-beneficiary firm, minus 1, multiplied by 100. Actual sales per worker of beneficiary firms are expected to increase relative to comparable non-beneficiary companies by the end of year 5. Source: ex post impact assessment, as described in the Monitoring and Evaluation Plan.							

Indicators	Flags*	Unit of Measure	Baseline	Baseline Year	Means of verification	Observations	EOP	
1.0 Difference between the percentage increase in sales per worker observed on the beneficiary firms over the percentage increase in sales per worker observed in comparable non-beneficiary firms.						The indicator is equal to the average real sales per worker for the beneficiary firms compared to the same indicator for a comparable non-beneficiary firm, minus 1, multiplied by 100. Actual sales per worker of beneficiary firms are expected to increase relative to comparable non-beneficiary companies by the end of year 5.	P	4.00

		%	0.00	2015	Source: ex post impact assessment, as described in the Monitoring and Evaluation Plan.			
Outcome:	2 Guaranteed loan tenor length.							
Observation:	The indicator measures the tenor length for the new loans guaranteed on the final year of the program compared to the baseline tenor length for the new loans at the beginning of the program. This indicator was added to measure the length effect on beneficiary firms. Given the lack of appropriate information, we are uncertain that a meaningful comparison with the control group is feasible. Source: ex post impact assessment, as described in the Monitoring and Evaluation Plan.
