

SECCIÓN 2: DESEMPEÑO

Resumen del desempeño del proyecto desde el inicio

Main results achieved so far: (i) the signature of the contract with IDB; (ii) Fulfillment of the conditions prior; (iii) Designation of project management; (iv) Meetings with beneficiaries for the beginning of the project; (v) Kick start of the baseline and project activities; (vi) the project activities were temporarily paused pending approval of the application for the IDB project HA-L1068, which was approved by the GoH and the no objection issued by the IDB in June 2015.

After the approval is obtained from the MCI, this component of the project will be restarted working closely with the MIF, as well as the beginning of the construction activities. We highly anticipate completing this project with complete success with minor delays in the implementation.

Comentarios del líder de Equipo de Supervisión

De acuerdo con los comentarios de la Agencia Ejecutora

The process with MCI aiming at obtaining the approval for the construction of the Micro Park Food Service took longer than expected which resulted in the project paralysis. The Micro Park was approved a couple of months ago and therefore the MIF Project could be reinitiated after an analysis of its relevance and its adequacy to the new context.

Resumen del desempeño del proyecto en los últimos seis meses

The main achievements of the semester were: (i) the complimentary project was approved by the MCI in May 2015; (ii) the no objection from the IDB was issued in June 2015; (iii) and the process to review the contracts to be signed between the MCI, IDDI and CODEVI was kicked started, and expected to be signed during the month of August 2015.

The main obstacles faced during the semester were: (i) Constant communication with the MCI regarding the status of the application.

In the next six months, the EA's efforts will be concentrated on: (i) Signing all necessary contracts and permits that will allow for the start of the construction of the micro park; (ii) Re-starting the project activities, in coordination with the MIF team; (iii) Complete an alphabetization process in conjunction with the Ministry of education to provide basic knowledge to those beneficiaries who do not read or write.

Comentarios del líder de Equipo de Supervisión

De acuerdo con los comentarios de la Agencia Ejecutora

During this semester a meeting will take place with the Executing Agency, representatives from Codevi, and the Bank's Specialist in charge of the supervision of the operation of Micro Parks in order to coordinate actions between the Micro Park construction and MIF technical assistance. The mentioned meeting will also be useful to review the logic of MIF Project, the indicators, the milestones and to establish a new execution plan for the Project.

SECCIÓN 5: SOSTENIBILIDAD

Probabilidad de que exista sostenibilidad después de terminado el proyecto: P - Probable

FACTORES CRÍTICOS QUE PUEDEN AFECTAR LA SOSTENIBILIDAD DEL PROYECTO

[No se reportaron factores para este periodo]

Acciones realizadas o a ser implementadas relativas a la sostenibilidad:

The key to the sustainability of the FPSMP project is based on the fact that the cooks can improve their profitability over time, compared to what they are gaining today with the current conditions.

Their development as micro-entrepreneurs as well as the creation of a virtuous circle investment – return will rely on the creation of a long-lasting change in cultural and social behaviors. At the micro park level, maintaining centralized services within fixed values over time, generating income and resources for investment in the replacement of individual and joint assets is key to ensure, successful micro entrepreneurs, in the medium and long term.

From the relationship developed, you can identify key elements of sustainability of the project, from:

The vision of the micro park as a place for micro production services:

1) Its self-sustainability in terms of: i) payment of centralized services and ii) investment capacity for the replacement of income generating assets (individual and joint);

The vision of the cooks (and their assistants):

2) Sustained and incremental revenue generation that enables them: i) to pay for the centralized micro park services, ii) to generate resources.

SECCIÓN 6: LECCIONES PRÁCTICAS

1. The development of binational project requires an executing agency with a solid presence in the territory where the project is located, with capable staff based there.
