

## SECCIÓN 2: DESEMPEÑO

### Resumen del desempeño del proyecto desde el inicio

Main results achieved so far: (i) the signature of the contract with IDB; (ii) Fulfillment of the conditions prior; (iii) Designation of project management; (iv) Meetings with beneficiaries for the beginning of the project; (v) Kick start of the baseline and project activities; (vi) Due to the risk and impact if the complimentary project is not approved by the GoH, the project activities have been temporarily paused.

The application for the IDB micro-park project HA-L1068 to complement our original project is well underway. The project has experimented delays since details have come up during the evaluation process by the MCI and several correction on points have been made. All the documentations have been resubmitted to the MCI after a careful review of their observations. The construction plans and budgets have also been revised with an engineering firm hired by the MCI for these purposes.

There is a risk to the project if the complimentary portion is not approved, however the EA is working closely with the MCI in order to obtain an approval, and has worked out all of the observed points.

After the approval is obtained from the MCI, this component of the project will be restarted working closely with the MIF, as well as the beginning of the construction activities. We highly anticipate completing this project with complete success with minor delays in the implementation once the approval from the MCI is obtained.

#### Comentarios del líder de Equipo de Supervisión

De acuerdo con los comentarios de la Agencia Ejecutora

As the EA states, the Project has not yet executed its core activities because it is crucial to have the Haitian Government approval to the complementary project, through which the new restaurant for the Park will be built.

A decision about the Project, its cancellation or redefinition, will have to be taken in the first semester of 2015 if this situation is not solve.

### Resumen del desempeño del proyecto en los últimos seis meses

The main achievements of the semester were: (i) the project was resubmitted to the MCI for the second time with their comments and observations from the first version submitted by the EA taken into account; (ii) the firm hired by the GoH to evaluate the business plan, contracted the services of a Haitian engineering firm to conduct an in depth evaluation of the construction plans, and budgets; (iii) a revision of the kitchen equipment list and distributors was conducted and an RFP was launched for a turnkey solution to the equipping of the kitchens, rather than the individual sourcing approach which had been considered; (iv) an agreement was reached with "La Casa de la Mujer Fronteriza" in Ouanaminthe, which was executed by IDDI with UNDP funds, to rent their conference facilities in order to conduct the training sessions for this project, this had been an obstacle in the past, because of the lack of adequate facilities in the area. The main obstacles faced during the semester were: (i) Carefully reviewing and addressing all the observations pointed out during the evaluation by the MCI. In the next six months, the EA's efforts will be concentrated on: (i) Pushing for approval for the complementary part of the project; (ii) Re-starting the project activities, in coordination with the MIF team as soon as the approval comes; (iii) Complete an alphabetization process in conjunction with the Ministry of education to provide basic knowledge to those beneficiaries who do not read or write.

#### Comentarios del líder de Equipo de Supervisión

De acuerdo con los comentarios de la Agencia Ejecutora

The efforts of the executing team have been focused during the semester in complying the documentation required to obtain the necessary permits from the Haitian Government. However, it stands as an important step the creation of links with institutions that can serve as allies, as the case of the mentioned agreement with "La Casa Border Women", which guarantees the facilities for the training activities that will be done in the future.

## FACTORES CRÍTICOS QUE HAN AFECTADO EL DESEMPEÑO

[X] Otros, cuáles?: Delays in obtaining the permits from the Haitian Government due to the need to fulfill specific requirements in terms of construction plans and budgets.

## SECCIÓN 4: RIESGOS

## RIESGOS MÁS RELEVANTES QUE PUEDEN AFECTAR EL DESEMPEÑO FUTURO

	Nivel	Acción de mitigación	Responsable
1. The complimentary project being submitted to the Ministry of Commerce and Industry of Haiti, which will allow additional funds for an enhanced project, using a micro park approach, is not approved.	Medio	A proposal for the IDB micro-park project HA-L1068 to complement the original project was submitted. The proposal has experimented delays since observations have come up during the evaluation process by the MCI. All the documentations have been resubmitted to the MCI after a careful review of their observations. The construction plans and budgets have also been revised with an engineering firm hired by the MCI for these purposes. The EA is working closely with the MCI in order to obtain an approval.	Coordinador del proyecto
2. The complimentary project being submitted to the Ministry of Commerce and Industry of Haiti, which will allow additional funds for an enhanced project, using a micro park approach, is not approved.	Medio	Approval of Project by the MCI	Coordinador del proyecto
3. There is no availability of specialized consultants to work in the area of intervention.	Baja	Whenever possible, only local consultants will be hired, otherwise international consultants will be used.	Invitado Proyecto
4. Financial institutions are not interested in providing financial products and services to Ouanaminthe micro and small enterprises.	Baja	Hay recursos dentro del proyecto para apoyar actividades de sensibilización y negociación con IMF para convencerlas de ofrecer productos y servicios a las MIPES	Invitado Proyecto
5. Industrial Park companies are no longer interested in implementing inclusive business in their operations.	Baja	Resources for companies awareness have been assigned	Invitado Proyecto
<b>NIVEL DE RIESGO DEL PROYECTO:</b> Baja <b>NÚMERO TOTAL DE RIESGOS:</b> 10 <b>RIESGOS VIGENTES:</b> 6 <b>RIESGOS NO VIGENTES:</b> 0 <b>RIESGOS MITIGADOS:</b> 4			

## SECCIÓN 5: SOSTENIBILIDAD

**Probabilidad de que exista sostenibilidad después de terminado el proyecto:** P - Probable

**FACTORES CRÍTICOS QUE PUEDEN AFECTAR LA SOSTENIBILIDAD DEL PROYECTO**

[X] Risk for the Project that the MCI does not approve the proposal.

It is difficult to determine the sustainability of the Project, considering that the implementation of relevant activities is still unable to start.

**Acciones realizadas o a ser implementadas relativas a la sostenibilidad:**

The key to the sustainability of the FPSMP project is based on the fact that the cooks can improve their profitability over time, compared to what they are gaining today with the current conditions.

Their development as micro-entrepreneurs as well as the creation of a virtuous circle investment – return will rely on the creation of a long-lasting change in cultural and social behaviors

At the micro park level, maintaining centralized services within fixed values over time, generating income and resources for investment in the replacement of individual and joint assets is key to ensure, successful micro entrepreneurs, in the medium and long term.

From the relationship developed, you can identify key elements of sustainability of the project, from:

The vision of the micro park as a place for micro production services:

1) Its self-sustainability in terms of: i) payment of centralized services and ii) investment capacity for the replacement of income generating assets (individual and joint);

The vision of the cooks (and their assistants):

2) Sustained and incremental revenue generation that enables them: i) to pay for the centralized micro park services, ii) to generate resour

## SECCIÓN 6: LECCIONES PRÁCTICAS

**[No se han agregado lecciones aprendidas todavía.]**
