

Synergies with other Programs

PROGRAM	DONOR	SYNERGY
Flood Mitigation Infrastructure Program	IDB	Flood control investment in Belize City
Sustainable Tourism Program II	IDB	Promoting disaster and climate resilient tourist destinations and environmental sustainability to improve the capacity to manage risk of natural disasters and adapt to climate change. Interventions in Caye Caulker, Corozal and Punta Gorda.
Belize Marine Conservation and Climate Adaptation Project	AF and WB	Implementation of priority ecosystem-based marine conservation and climate adaptation measures to strengthen the climate resilience of the Belize Barrier Reef System.
Climate Resilient Infrastructure Project	WB	Enhancing the resilience of road infrastructure against flood risk and impacts of climate change. Retrofitting and rehabilitating road networks complete with drainage and flood mitigation systems, after carrying out necessary feasibility and engineering studies.
Global Climate Change Alliance	EU	Enhance adaptive capacity and resilience to climate change in national policies, including the water sector.
Support for the Preparation of Integrated Disaster Risk Management	IDB	Design and implementation of a national Integrated Disaster Risk Management (IDRM) Plan, within the Comprehensive Disaster Management (CDM) framework and emphasizing ex ante risk reduction including adaptation to climate variability and change.
Support for priority actions to operationalize the Implementation Plan for Development Resilient to Climate Change in the Caribbean	UK-DFID	Expand knowledge and capacities through evidenced adaptation initiatives, and strengthen institutions for greater climate security; scale up delivery of adaptation programs in a range of key vulnerable sectors that are critical for sustained and expanded livelihoods; support effective national, regional and international level climate architecture to deliver climate change/adaptation financing.
Caribbean Climate Smart Islands Program	IDB	Piloting ways of transitioning to low carbon and climate resilient pathways for Tobago, Caye Caulker and Harbour Island. Adaptation interventions being proposed to increase Caye Caulker's coastal resilience.
